DEVOPS ENGINEER (M/F/D)

stratec ● ●

STRATEC develops and produces fully automated analyzer systems under the name of many of the leading global in vitro diagnostics companies as well as Hematology and Clinical Chemistry systems that are marketed under the Diatron

BECOME PART OF OUR TEAM

KEY RESPONSIBILITES

- Develop and improve our CI/CD infrastructure to streamline deployment processes.
- Keep software build pipelines up to date and efficient.
- Advise other Software Engineers on best practices related to software builds and releases.
- Assist the team during the migration to a modernized software build environment.
- Find, evaluate, and implement new tools to enhance the software development process.

KEY REQUIREMENT

- Bachelor's degree in Computer Science or a relevant field.
- Experience in DevOps or related fields.
- Experience with containerized applications (e.g., Kubernetes, Docker).
- Proficiency with CI/CD tools (e.g., Git, Bitbucket, Jenkins, ArgoCD, Artifactory).
- Familiarity with software builds using dotnet and/or MSBuild.
- Knowledge of practices and procedures for full software development life cycle.
- Experience working in an agile development environment.

HAVE WE SPARKED YOUR INTEREST?

At STRATEC, you can expect a dynamic team, an open working culture, and a flat hierarchy. We are proud to offer long-term employment prospects and challenging and varied tasks. We are looking for new employees who show initiative and are willing to take on different challenges creatively and dynamically.

Please send us a copy of your latest CV along with your salary requirements and earliest start date to the following address: JobsCluj@stratec.com .
